SUMMARY

Software Engineer with 2+ years of experience building scalable applications, backend systems, and RESTful APIs. Skilled in developing reliable, high-performance solutions with a focus on system design, automation, testing, and performance optimization. Familiar with cloud technologies, AI-assisted development, CI/CD pipelines, and distributed systems.

EDUCATION

Marathwada Mitra Mandal's Institute of Technology, Lohegaon, Pune **August 2019 – July 2023**
B.E. in Computer Engineering **CGPA: 7.48** *Pune, Maharashtra*

WORK EXPERIENCE

- **Software Developer — CloudLead Technologies Pvt Ltd** June 2024 – Present
 - Developed and maintained scalable backend services, microservices, and RESTful APIs, ensuring high performance, reliability, and maintainability.
 - Designed reusable backend components and service integrations to support enterprise workflows and large-scale data processing.
 - Worked with MySQL, PostgreSQL, and MongoDB to design efficient data models, optimize queries, and improve application performance.
 - Collaborated with frontend and product teams to develop and integrate scalable web application features and APIs.
 - Implemented secure backend logic and optimized API performance, ensuring reliability and data integrity across systems.
 - Performed debugging, monitoring, and root cause analysis of production issues, improving system stability and response times.
 - Developed unit and integration tests to ensure software quality, reliability, and maintainability.
 - Used Git, Docker, Linux, and CI/CD pipelines to streamline development, testing, and deployment processes.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, C++
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, Microservices
- **Databases:** MySQL, PostgreSQL, MongoDB, SQL
- **Cloud & DevOps:** AWS (Basics), Docker, Linux, CI/CD Pipelines
- **Frontend:** React.js, HTML5, CSS3
- **Testing:** Unit Testing, Integration Testing, API Testing
- **Core Concepts:** Data Structures, Algorithms, OOP, Design Patterns, System Design
- **Version Control:** Git, GitHub

PROJECTS

– **Mongo Explorer — Large-Scale Data Analytics Platform**

- * Developed a scalable data analytics platform processing datasets from thousands to over 40 million records with high accuracy and stability.
- * Implemented optimized pagination and fast-loading views, reducing initial load times by up to 50% and enabling smooth navigation of large datasets.
- * Built a multithreaded parallel processing system for live counting and aggregation, improving performance by 60% with real-time progress tracking and cancellation.
- * Designed advanced pivot tables with multi-dimensional grouping and merged pivots, ensuring 100% accuracy.
- * Integrated Elasticsearch with Docker as a high-performance search layer alongside MongoDB, reducing complex query and aggregation response times from minutes to seconds using optimized indexing and scalable architecture.
- * Integrated AI-assisted workflows to improve data exploration, query generation, and analysis efficiency for large-scale datasets.

– **Visitor Management System (VMS) - Secure Access Attendance Platform**

- * Designed and developed a secure visitor and employee management system to control entry, exit, and daily attendance using structured, rule-driven workflows.
- * Implemented QR-based access mechanisms for visitors and employees, ensuring correct state transitions for entry, exit, overtime handling, and invalid scan prevention.
- * Applied field-level encryption for sensitive identity and credential data, ensuring data confidentiality while preserving accurate reporting and operational performance.
- * Built an automated attendance lifecycle engine to handle daily closures, overtime classification, missed exits, and system-driven record finalization.
- * Developed a React-based administrative dashboard with real-time status views, searchable logs, and paginated reports backed by optimized backend services.

CERTIFICATIONS

- * Java from Basic to Advanced — Udemy
- * Full Stack Java Development — Simplilearn
- * SQL from Basic to Advanced — Udemy
- * Developer Job Simulation Program — Accenture Nordics
- * Skillyst Techtopia Coding Challenge — Foundit

CODING PROFILE

- * **HackerRank** : Gold Badge and Five Star Rating in Java
